Homestead, Pa., Sept. 17.—Eighteen workmen from Philadelphia arrived this morning and were put to work in the mills. OUTRAGES BY BRIGANDS. Reports of Startling Atrocities Come From Stelly.

London, Sept. 17 .- A report from the Pultish Consul at Palermo contains some horrible facts regarding the outrages by brigands in Sicily. Great land owners, living within four hours of Palermo, are afraid to remain on their estates un-less they are surrounded by private mounted guards. A Huge Precious Stone. A Huge Precious Stone.

The second largest diamond in the world is now, according to Ueber Land und Meer, undergoing the cutting process at Antwerp. Its weight is at present 474 carats, but it will lose no less than 274 carats before it is ready for the market. Even then, however, it will be the second largest diamond in the world, standing between the 280 carats of the Persian diamond "Great Mogul" and the 1977-10 carats of the Russian "Orloff" brilliant. Roughly speaking, the Antwerp stone will be about the size of a pigeon's egg. In ita present state it measures 2,741 inches by 1.767 inches. Its polished surface will meas ure 1,786 inches each way. Some idea of the enormous expense of the transmutation of these costly trifles from the natural to the commercial state may be gathered from the fact that the great English crown diamond, the Koh-i-Noor, which has only the comparatively modest weight of 102% carats, cost no less than £8,000 to cut and polish. The polishing of a very large diamond is a very slow process, and it will be a long time before the actual value of the Antwerp stone can be determined, as its lustre and water cannot be decided until it has left the
